

PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on experience building production-grade Retrieval-Augmented Generation (RAG) systems, LLM orchestration pipelines, and multi-database (PostgreSQL, Qdrant, Neo4j). Skilled in Python, LangGraph, NLP, and AI safety/guardrail design, with direct experience deploying secure, low-latency conversational AI across healthcare and financial domains. Strong analytics foundation (SQL, Power BI) and fast-growing expertise in machine learning and generative AI engineering.

EDUCATION

B.Tech, Information Technology - M.L.V. Textile & Engineering College, Bhilwara (Raj.)	2023-2027
Senior Secondary (12th) - S.S.N.V.P. Inter College, Karkauli, Pinahat, Agra (UP)	2022-2023
Secondary (10th) - Manglik Shiksha Kendra, Bamrouli, Fatehabad, Agra (UP)	2020-2021

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS

AI & Machine Learning: RAG, Self-RAG, Prompt Engineering, NLP, Agentic Workflows, OpenAI API, Claude API, RAGAS, Hybrid Search, Semantic Search, Sentence-Transformers.

Frameworks & Orchestration: LangChain, LangGraph, LangSmith.

Databases, Platforms & Infrastructure: PostgreSQL, SQL, Qdrant, Vector Databases, Redis, Neo4j (Graph DB).

Backend & APIs: FastAPI, REST APIs

AI Safety & Governance: Guardrails AI, LLM-Guard, PII Masking, Prompt-Injection Defense.

Data Processing: PDF Parsing, Document Processing, Text Chunking, Metadata Extraction, PyPDFLoader, Docling.

Tools: Git, GitHub, Docker, VS Code

EXPERIENCE

Mobcoder AI - AI/ML Engineer Intern	<i>March 2026 – July 2026</i>
- Built and deployed two production-grade Retrieval-Augmented Generation (RAG) platforms spanning the financial and healthcare domains - Worked across the AI stack retrieval pipelines, agentic orchestration, vector/graph databases, and safety guardrails to ship secure, low-latency conversational AI systems. - Engineered hybrid retrieval pipelines combining dense vector search, BM25, and cross-encoder reranking, cutting query latency to sub-0.1s while maintaining high answer relevance across financial and medical datasets. - Implemented AI safety and governance layers including PII masking, prompt-injection defence, and adversarial scanning, ensuring HIPAA-conscious, audit-ready deployments for healthcare and financial clients.	

PROJECTS

Alphalens AI — Financial Document Intelligence & RAG Platform	Demo Link
Tech Stack: Python, FastAPI, Next.js, Qdrant, LangGraph, Guardrails AI, sentence-transformers, Docling	
- Built a hybrid RAG platform (dense vector + BM25 search with cross-encoder reranking) for financial PDF analysis, achieving sub-0.1s retrieval latency. - Designed LangGraph-based agentic query routing and Self-RAG reflection loops to reduce hallucinations and improve answer quality. - Added Guardrails AI for PII masking and prompt-injection defense, plus dual-layer caching delivering 0.04s repeat-query responses.	
Medical-Grade AI Assistant & Knowledge Spine — Healthcare RAG	Demo Link
Tech Stack: Python, PostgreSQL, Qdrant, Neo4j, LLaMA-3.3-70B, Phi-3.5, Qwen3-Embedding, Alembic, llm-guard	
- Architected a multi-database AI infrastructure (PostgreSQL, Qdrant, Neo4j) for a medical-grade conversational assistant with immutable audit logging. - Built an LLM governance gateway with semantic caching and parallel Self-RAG retrieval for accurate, low-latency responses. - Integrated LLM-Guard adversarial scanning and an NLP-driven pharmacovigilance feature with citation-enforced safety guardrails.	
Self-Correcting RAG Pipeline — Enterprise Knowledge Intelligence System	Demo Link
Tech Stack: LangGraph, LangChain, Groq LLMs (Llama 3/Mixtral), Qdrant, Cross-Encoders, PyPDF & Tesseract OCR.	
- Architected a self-correcting RAG pipeline with a Grader LLM, cutting hallucination rate from 40% to under 10%. - Built an adaptive retrieval loop that rewrites queries and refuses on insufficient evidence, boosting refusal accuracy from 15% to 90%. - Implemented post-generation claim verification via cross-encoder re-ranking to validate responses against source documents.
